

Mactaquac Dam

Community Meeting with NB Power

July.14th @ the Culture Center

5pm

NB Power is seeking community input on the future status of the Mactaquac Dam.

The Mactaquac Hydroelectric Generating Station is expected to reach the end of its operating lifespan in the year 2030. NB Power has identified 3 options in regards to the future of this Dam:

- ❖ Decommission
- ❖ Removal
- ❖ Upgrade

These 3 options represent broad implications for communities within New Brunswick as well as the Natural Environment. NB Power is seeking to provide information in regards to these options and receive feedback from First Nation's, experts, and all New Brunswicker's before a decision is made in 2016.

***For more information Please contact Megan Fullarton from the SMFN Consultation Department @ (506) 459-2200 (extension.108)**

Dinner will be provided
