

TRANSCANADA OIL PIPELINE

Technical Update

This is your first opportunity to learn directly from your own scientists about the technical aspects of the Energy East Project and your primary opportunity to have your concerns heard!

You are encouraged to attend a critical community workshop on the Energy East Project being held: Thursday June 2, 2016 @ 6:00pm. Located at the Culture Centre. (Refreshments will be provided!)

These workshops will:

- ❖ 1. *Present key environmental, cultural, and socio-economic concerns with project so that our membership can be informed by their own scientists on what the Energy East Project is all about.*
- ❖ 2. *Record our membership's perspective on how the project may impact our traditional land and resource use. This is a **UNIQUE and CRITICAL** opportunity for community members to have their concerns recorded and included in the reports that are going to Trans Canada for consideration.*

FOR MORE INFORMATION CONTACT: ERICA PAUL @ 458-9511
